Flexible Clamps

For multi-use and aortic cross clamping. The rigid shaft enables tunneling and accurate clamp placement. Can be maneuvered to a location remote of the surgical procedure.

Controlled Strength

- » Comparable in strength to bulkier, aortic clamps.
- » Provide greater access, control and flexibility in your procedures.

Ergonomic Advantage

- » An ergonomically designed handle gives you quick release capabilities.
- » Gives you precision instrument ratcheting.

11 - 31601

12-6406 / 12-6005
