SternaLock®Blu

The new standard in primary closure.

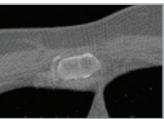

Don't let sternal recovery take away from your life-saving procedures.

Let rigid sternal fixation be the signature of your masterpiece.

CT Scan of sternum with SternaLock Blu 6 months post-operative

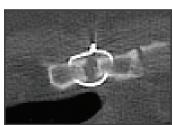

Avial Slices

CT Scan of sternum with wire 6 months post-operative

ction Axial SI

CT scan **shows separation of the sternal body** with wires

CT scan shows well-apposed sternum with plates and screws

- Increased stability^{1,2}
 Greater strength¹
- Reduced sternal separation¹
- Superior bone healing³
- Reduced pain and narcotic usage³

Features of the SternaLock Blu Rigid Fixation System

- Rigid fixation system for use following sternotomy or sternal reconstructive procedures
- Patent pending cuttable cross-sections for emergent re-entry
- · Uniquely designed thin plates for anatomical fit
- Cancellous screws designed for the sternum
- · Specially designed instrumentation
